SUMMARY ANALYSIS

REMOTE VIEWING (RV) SESSION DC-1

SG1A

1. (S/NOFORN) This report documents a remote viewing session conducted in compliance with a request for information on a target of interest. The mission was to locate where [REDACTED] SG1A

[REDACTED] of the kind shown in the cuing photographs.

2. (S/NOFORN) The protocol used for this session is detailed in the document Grill Flame Protocol, AMSAA Applied Remote Viewing Protocol (S), undated.

3. (S/NOFORN) At TAB A is a summary of the data presented by the remote viewer during the session. A complete transcript of the session is available upon request. At TAB B are drawings made by the remote viewer reference his impressions of the target site. At TAB C is the map on which the viewer indicated where he thought the target(s) were located. At TAB D is target cuing information provided the remote viewer.

4. (S/NOFORN) The summary at TAB A represents the salient points provided by the remote viewer and as such has not been subjected to any intermediate analysis, evaluation or collation. Interpretation and use of the information provided is the responsibility of the requestor.

TRANSCRIPT SUMMARY

REMOTE VIEWING (RV) SESSION DC-1

1. (S/NOFORN) The following information was obtained at 1000 hrs, 03 November 1980. Source #10.5.

a. (S/NOFORN) Source reported seeing what appeared to be three dots sort of on line and that the last dot was further away than other two, by twice as much distance. He later explained that this distant dot represented an area near Vladivostok (see TAB C).

b. (S/NOFORN) He felt middle dot was in mountains, probably the Urals, the southern Urals. Felt very strongly that the dot in the mountains was the one we were looking for. Stated that the area doesn't look like it is very well cleared yet. Desolate, unpopulated area. Felt that two side buildings were present. Reported that stuff that goes on upper top not there yet. Described scaffolding only on one side -- about 40' up (TAB B, drawing 2). Area is recognizable from overhead. However, he reported many trees still all around. He reported that SW of site (see drawing TAB B) was fair size body of water. This body of water (which he later decided was a river) is located about 100 miles from the site. Felt that area was a sort of flood basin with series of interconnecting rivers/creeks. Looking in SE direction he reported seeing nothing of interest/concern. Source reported that to the north about 200 miles was a large industrial city. This city is located on the west side of the mountains. He reported seeing a lot of smoke-stacks, like a mining city.

c. (S/NOFORN) After the session, the source was asked to attempt a "map dowsing" exercise to see if he could locate the target site in that manner. See TAB C.

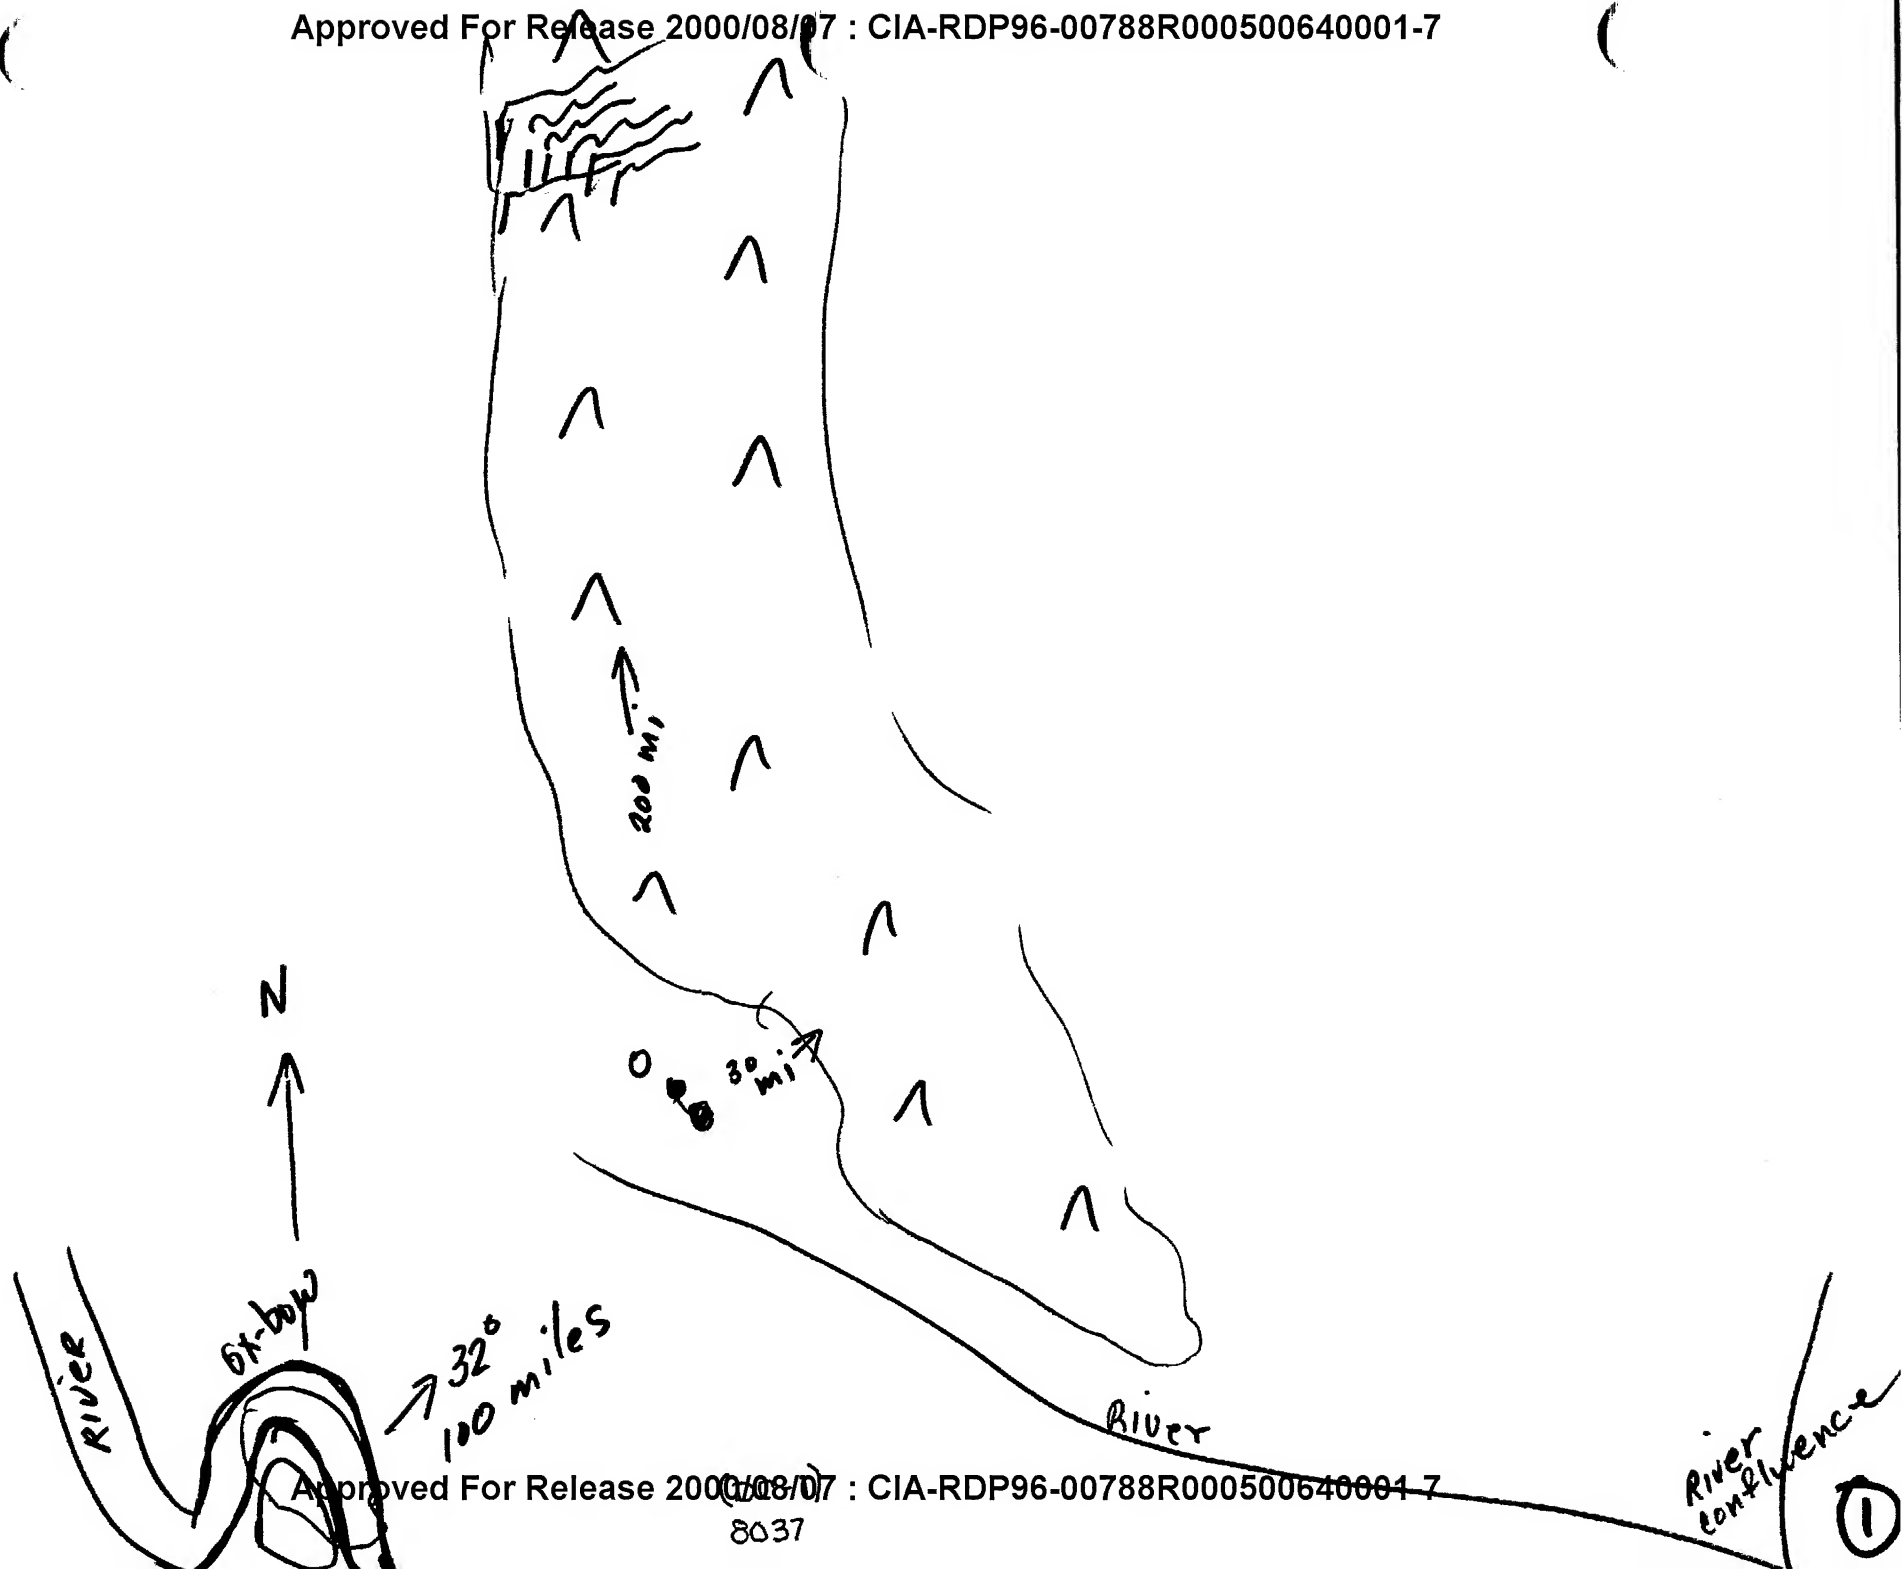

2. (S/NOFORN) Request the above information, once evaluated, be returned with comments to this office (ATTN: IAOPS-H-S). Comments should be in writing. This will permit a full evaluation of the source of information by this office. A detailed transcript can be provided concerning the above project session if necessary.

TARGET CUIING INFORMATION

REMOTE VIEWING (RV) SESSION DC-1

1. (S/NOFORN) Prior to the session the viewer was shown several photographs (provided by the tasking agency) of [REDACTED]. The photographs depicted the site during various stages of development. The viewer was also shown [REDACTED]. The photographs are not included in this report due to their classification.

SG1A

SG1A

2. (S/NOFORN) The viewer was told that USI was trying to locate where the Soviets are allegedly building another of these [REDACTED].

SG1A

3. (S/NOFORN) Prior to the session, all material relating to this project was stored in the SSO facility with access to the material being limited to the project manager. Although this is the first time the source had worked on this problem, we had worked the tasking earlier with a different remote viewer and interviewer.
